**Recommendation of:**

**American Building Management**  
President: Mike Pitts  
7258 North Blue Sage  
Punta Gorda, FL 33955

American Building Management served as the contractor for The Salvation Army at the above address. The company was hired to build a Chapel on our property. Which include a worship center, three office's a conference room, six classrooms and much more.

During the course of our professional relationship, it was great dealing with them for the life of the project. Groundbreaking was on November 2006 and the completion of the project was in January 2008.

During that time, Mike and his staff met all deadlines and the quality of their work was superb. The times we asked for changes, they were carried out quickly and professionally.

I am proud to recommend American Builders. I always found their work to be most satisfactory.

Sincerely,

**Captain Alejandro Castillo**  
Area Coordinator

*Assembly of God*

To Whom It May Concern:

In regards to Mike Pitts and American Building Management, I must say that I have been very pleased with the way Mr. Pitts has followed through with the reconstruction insurance claim.

Mr. Pitts is good to his word, follows through with his promises, and corrects mistakes, making decisions for the best of your church at a fair price.

I would not only recommend Mr. Pitts and American Building Management, but would use them again. Both my board and I are satisfied with the job.

God bless you,

To whom it may concern,

**DB Sound Systems has been working with general contractors installing sound systems since 1989 in Charlotte County and surrounding areas. Hurricane Charley caused a major influx of restoration work entailing us to work with more general contractors than ever before in our past business history.**

**American Building Management, Inc. has been among the top general contractors that we have had the pleasure to work under. Our company has worked with small General Contractors on up to large companies such as, Owens Kimball doing all the schools and Mathews Taylor performing all the county restoration projects and I will put their work right up with the quality of those companies.**

**As a subcontractor, scheduling for our office is everything. The delay that 80% of all other GC's that we have worked under has been extremely inconvenient and challenging for our installation scheduling and ordering of equipment. Our experience with American Management, Inc. and their staying on schedule or coming in earlier than expected was so impressive I can't begin to say enough.**

**The crew here at DB Sound Systems was very impressed with American Management, Inc.'s quality of work and their ability to make certain that everything that was needed to be prept, etc. was correct and ready when they would arrive for different facets of our trade. DB Sound Systems highly recommends American Management, Inc. for your project and am confident you will be more than pleased with the end result of their work.**

Sincerely,

  
**Debra Picard**  
DB Sound Systems

Attention Mike Pitts

August 1, 2008

Gentlemen:

We have passed our final first year inspection and are very pleased with the all the work your Company did in bringing this major project to a successful completion. It would have been an almost impossible task for us with out your excellent support.

Our 7,000 square foot education and office building was all most completely destroyed by Hurricane Charley. Reconstruction of this facility was a major challenge not only because of the destruction but the fact the facility had been rebuilt piece meal in the last 30 to 40 years. The facility no longer met current building codes. Also the plumbing, Electrical system, ventilation and sanitary facilities were obsolete and had to be replaced. After hiring an architect to design the new facility, we engaged your company to manage the rebuilding of the new facility

Your company was responsible for getting bids from various contractors, selecting the contractors and supervising the various phases of the rebuilding of the project. It was your Companies responsibility to see that the work was done right and met all inspection requirements.

We were and are very pleased that your Company met all these needs and brought about the completion of this over \$2,000,000 facility within our anticipated cost. Your personnel met and worked very closely with various Church officials as needed. We can only say thanks for a job well done. We highly recommend your Company.
